•HTMl   •CSS   •Python   •SQL   •MS Excel   •**Database**: MYSQL

PROJECTS

Computer Aided Diagnosis for Pulmonary Diseases Using 3 Dimensional Images (Python)

Our project's success came from using 3D medical image analysis and computer-aided diagnosis for pulmonary disorders. This method improved diagnostic precision, enabling better detection of these diseases. Advanced imaging equipment enhanced early identification and diagnosis, improving patient care and treatment outcomes.

E-Farming Business Management

The concept of internet business has been successfully utilised in our project. The project helps save time by utilising market-fresh products. By adopting management, we can stay away from intermediaries.

ADDITIONAL

• Python internship accredited by Kaashiv

• Python certification in Simple Learn

• Game development workshop at Saveetha Engineering College

• I frequently code on websites like HackerRank

HABBIES

•Cricket   •Body Fitness   •Watching Movies & Anime
